# **The China Factor**

## **And Her Place In The Shaking Of The Nations**

The United States Of America was birthed to make a place for the Church to function at its best, and for special events to occur at the end of time - Isa 18:7 *“At that time shall a tribute be made to the Lord of hosts [Jehovah Tsaba] from a people tall and polished, from a people terrible from their beginning and feared and dreaded near and far, a nation strong and victorious, whose land the river or great channel divides--to the place [of worship] of the Name of the Lord of hosts [Jehovah Tsaba], to Zion.”*

**Picture the Year as 2015.** God knew how to use China to shake the nations of the world. Much like He did the Pharaohs of Egypt in ancient times, Jehovah took the cruel, heartless government of China into His hands as His pawn. God had promised, Isa 14:26-27 KJV *“This is the purpose that is purposed upon the whole earth: and this is the hand that is stretched out upon all the nations. (27) For the LORD of hosts [Jehovah Tsaba] hath purposed, and who shall disannul it? and his hand is stretched out, and who shall turn it back?”*

China is the richest, most powerful nation on Earth, much like Egypt following the seven years of plenty, a period that pulled Israel into Egypt where they were in bondage for over 400 years. It is **2015**...and the United States' **GOLDEN AGE** has come to a halt. It was a **deliberate stealth attack** from Beijing. A total economic

**attack in which billions of U.S. dollars quietly, purposefully disappeared... with more devastation than U.S. citizens could have ever imagined had they even been aware of it.**

As stated in the prophecy, most U.S. citizens were in fact totally unaware: The news and media headlines should have been “NEW BRICS BANK TO BE BASED IN SHANGHAI, CHINA!”

But, of course, there was nothing alerting the U.S. population of this event or what it meant, and even today, in mid-2019, few people have any idea what this is referencing. Formed in 2008, BRICS celebrated their a decade of annual summits as they built out a “stealth attack” against the U.S. dollar dominance. Currently, they are almost ready to take down the dollar as the “global world trade currency.” Here is information unknown to most U.S. citizens:

BRICS is the acronym coined for an association of five major emerging national economies: Brazil, Russia, India, China and South Africa. Originally the first four were grouped as "BRIC" (or "the BRICs"), before the induction of South Africa in 2010. The BRICS members are known for their significant influence on regional affairs. Since 2009, the BRICS nations have met annually at formal summits. China hosted the 9th BRICS summit in Xiamen on September 2017, while South Africa hosted the most recent 10th BRICS summit in July 2018. The term does not include countries such as South Korea, Mexico and Turkey for which other acronyms and group associations were later created.

In 2015, the five BRICS countries represent over 3.1 billion people, or about 41% of the world population; four out of five members (excluding South Africa at #24) are in the top 10 of the world by population. As of 2018, these five nations have a combined nominal GDP of US\$18.6 trillion, about 23.2% of the gross world product, combined GDP (PPP) of around US\$40.55 trillion (32% of World's GDP PPP) and an estimated US\$4.46 trillion in combined foreign cash reserves.

Here are combined news articles that help to educate those unfamiliar with BRICS:

In this picture, President Xi Jinping of China opens the BRICS summit to establish World Central Development Bank in Shanghai

## China gets BRICS bank

BBC News –  
China

The group of emerging economies, known collectively as BRICS, signed the long-anticipated document to create the \$100B BRICS Development Bank and a reserve currency pool worth over another \$100B. Both will counter the influence of Western-based lending institutions and the dollar.

The new bank will provide money for infrastructure and development projects in BRICS countries, and unlike the IMF or World Bank, each nation has equal say, regardless of GDP size.

Each BRICS member is expected to put an equal share into establishing the startup capital of \$50 billion with a goal to reach \$100 billion. The BRICS bank will be headquartered in Shanghai, China. India will preside as president the first year, and Russia will be the chairman of the representatives.

“BRICS Bank is to be one of the major multilateral development finance institutions in this world,” Russian President Vladimir Putin said on Tuesday at the 6th BRICS summit in Fortaleza, Brazil. China hosted the 9th BRICS summit in Xiamen on September 2017, while South Africa hosted the most recent 10th BRICS summit in July 2018. The term does not include countries such as South Korea, Mexico and Turkey for which other acronyms and group associations were later created.

In 2015, the five BRICS countries represented over 3.1 billion people, or about 41% of the world population; four out of five members (excluding South Africa at #24) are in the top 10 of the world by population. As of 2018, these five nations have a combined nominal GDP of US\$18.6 trillion, about 23.2% of the gross world product, combined GDP (PPP) of around US\$40.55 trillion (32% of World's GDP PPP) and an estimated US\$4.46 trillion in combined foreign reserves

The Deal was reached after intense last-minute negotiations to settle a dispute Between India & China over establishment of the headquarters of the new bank in Shanghai, China

The big launch of the BRICS bank is seen as a first step to break the dominance of the US dollar in global trade, as well as dollar-backed institutions such as the International Monetary Fund (IMF) and the World Bank, both US-based institutions that BRICS countries have little influence within.

“In terms of escalating international competition the task of activating the trade and investment cooperation between BRICS member states becomes important to our plan to displace ‘western’ dominance,” Chinese President Xi Jinping said.

In 2013, they passed the 4 Trillion Dollar mark to pass the U.S. and become the largest trade country in world. Shanghai, China became a world-class city of elegance and prominence in business, industry and culture for its citizens.

In 2009, when the world was in recession, China leapfrogged the U.S. to become the world’s largest auto market. In 2010, China overtook Germany as the world’s largest exporter. In 2012 China surpassed Japan to become the world’s largest luxury goods market.

Today, BRICS moves forward and strengthens its plan to oust the United States as the world's primary leader in world banking affairs through the origination of

China, Russia, Brazil, India, and South Africa account for 11 percent of global capital investment, and trade turnover almost doubled in the last 5 years, the president reminded.

Each country will send either their finance minister or Central Bank chair to the bank's representative board.

Membership may not just be limited to just BRICS nations, either. Future members could include countries in other emerging markets blocs, such as Mexico, Indonesia, or Argentina, once it sorts out its debt burden.

BRICS represents 42 percent of the world's population and roughly 20 percent of the world's economy based on GDP, and 30 percent of the world's GDP based on PPP, a more accurate reading of the real economy. Total trade between the countries is \$6.14 trillion, or nearly 17 percent of the world's total.

The \$100 billion crisis lending fund, called the Contingent Reserve Arrangement (CRA), was also established. China will contribute the lion's share, about \$41 billion, Russia, Brazil and India will chip in \$18 billion, and South Africa, the newest member of the economic bloc, will contribute \$5 billion.

The idea is that the creation of the bank will lessen dependence on the West and create a more multi-polar world, at least financially.

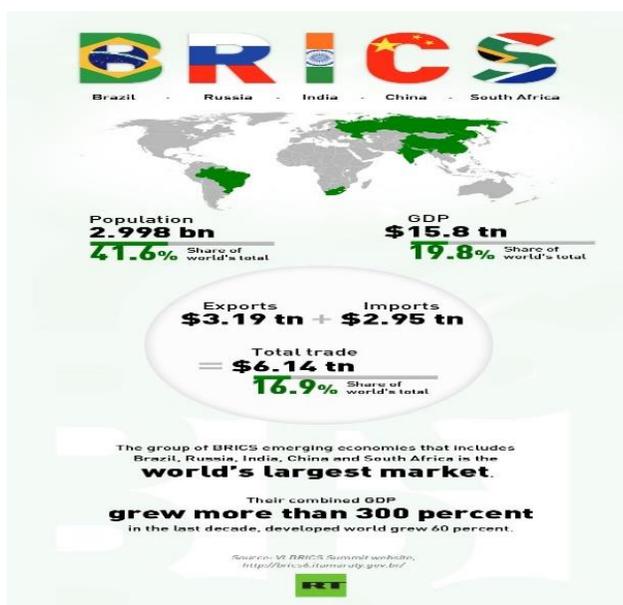

Experts say the new bank and fund will give the group the backbone of a formal organization. The talks in Fortaleza will open a series

of marathon summits and bilateral meetings in Brazil.

Chinese President Xi Jinping met ahead of the summit with India's Prime Minister Narendra Modi, who described their first face-to-face talk as a "very fruitful meeting."

For Putin, who visited Argentina and Cuba before coming to Brazil, the trip gives him a chance to hammer home his calls for a "multipolar" world amid tensions with the West over the Ukraine crisis.

The meetings give Putin his first international summit since being kicked out of the G8 group of industrialized nations over the Ukraine crisis.

After a July 16, 2014, BRICS-South America summit, Xi launched the China-Latin America forum, highlighting Beijing's growing interests in Mexico, a region perceived as the backyard of the United States.

Chinese media on Wednesday hailed the creation of the BRICS development bank, to be based in Shanghai, blaming Western

countries and multilateral agencies for flaws in the global financial system.

At a summit in Brazil, the BRICS group of emerging economic powers -- which also includes Russia, India, China and South Africa -- on Tuesday created the New Development Bank to finance infrastructure projects. (See Addendum, New Development Bank)

China's official news agency Xinhua cited Western dominance of the international financial system as the motivation.

"The plans of the emerging-market bloc of BRICS to establish a development bank usher in a long-awaited and helpful alternative to the Western-dominated institutes in global finance," Xinhua said in an editorial.

An opinion piece in the Global Times newspaper, known for its nationalistic editorial stance, said competition from the BRICS bank could prompt the World Bank and the International Monetary Fund (IMF) to carry out much-needed internal reforms.

"BRICS countries have to blaze a new trail to reduce losses as well as safeguard interests," wrote Liu Zongyi, a research fellow at the government-linked Shanghai Institute for International Studies.

"Loans from the World Bank are not able to meet the demands of the developing nations... The IMF also failed to play an active role in stabilizing the turbulent emerging financial markets during the global financial crisis," he said.

Developing countries were at the mercy of the United States during the recent economic crisis, he said, given the dominance of the dollar and Washington's timing of its quantitative easing policy.

Hong Kong's pro-China Wen Wei Po newspaper said BRICS members' selection of China's commercial hub for the headquarters symbolized the rise of the country, now the world's second largest economy.

"Setting up the headquarters of the BRICS Central Development Bank in Shanghai shows the image of China becoming a great power on the international stage," the newspaper said.

Stay tuned as this great prophetic CHINA FACTOR prophecy continues to unfold in the Day of Jehovah Tsaba. Look for additional astounding developments between now, 2019 and 2025.

Remember, this is **2015** and China has secretly become the richest and most powerful nation on earth:

Claire – the American girl who works as the family’s nanny – gets the children ready to go to school, just like everybody else growing up in California.

Claire’s father works in China too. At General Motors Intl., the Chinese “**red chip**” in Hong Kong. And owned in major part by the PLA, (People’s Liberation Army), China’s massive military.

Over 40% of the cars in the world are made here. The PLA now also owns a major portion of Mitsubishi Motors and Ford Motor Co.

Along China’s coast, thousands of huge factories hum 24/7, cranking out 60% of the world’s textiles, sophisticated electronics, and computers for the world’s Tech industry.

## History

In May 2005 SAIC-GM completed construction of a new assembly plant, the South Plant, at its facility in eastern Shanghai's Pudong district, more than doubling its annual production capacity to 320,000 vehicles.<sup>[4]</sup>

SAIC-GM was the top passenger vehicle producer in China in 2006, with sales of 413,400 vehicles. In 2011, SAIC-GM sold 1,200,355 vehicles in the Chinese market.<sup>[5]</sup> SAIC-GM is the largest joint venture GM has in China.<sup>[6]</sup>

In September 2006, General Motors launched the Chevrolet Corsa Plus in Chile, a version of the 4-door Opel Corsa with a 1.6L engine, making it the first export market to receive a vehicle manufactured by SAIC-GM.

In February 2010, SAIC acquired an additional 1 percent stake in the joint venture for US\$85 million and assistance in securing a US\$400 million line of credit to boost SAIC's total share of SAIC-GM to 51%.

**China now manufactures more automobiles than any other nation in the world:**

China surpassed Japan to become the world's second-largest vehicle market in 2006, and passed the United States to become the largest in 2009.

## **JEHOVAH TSABA IS SHAKING THE NATIONS**

See, back in 2005 (where we live now), nobody even saw it coming.

Sure, China was showing up everywhere in our lives. And no one seemed to understand what was happening, or even gave it that much attention for that matter.

China? Imports, up 40%. Industrial output, up 50%. Annual growth, headed for 20%. China had just swallowed up nearly half the world's cement (in a 12 month period)... 30% of the world's oil... 90% of the world's steel... and more than double the world' demand for copper. Not to mention iron ore, aluminum, timber, wheat, nickel, coal, and just about every other raw resource you can imagine.

The news media kept it out of the headlines, no need to panic the U.S. markets. No one was addressing the fact that our factories (true U.S. production) was virtually disappearing. No one seemed alarmed when students entering the universities were told that we were entering into a new kind of globalization in the work force. Everyone was talking about the exporting of the non-labor work force to the east, and we became accustomed to calling for phone support for our purchases, and reaching someone in China, India, or some other eastern dialect. It was sometimes hard to get them to understand our questions and concerns, even more often hard to understand their command of the English language. But like good little lambs being led to the slaughter, the U.S. masses remained basically silent as the quiet economic evolution occurred.

In 2005, and the few years preceding, we noticed U.S. elected officials seemed to be interacting with other nations, the United Nations, or some other foreign interest, rather than with their own constituents at home. Still, in rapid succession, significant events occurred which went without any real outcry of the nation's laborers.

As the first decade of the 21<sup>st</sup> Century progressed, China just kept growing. She exponentially sucked the world dry of oil...minerals...and other raw resources...while one cargo ship after another steamed out of her ports, filled with products to dump overseas.

Just a few months into President George W. Bush's second term, it became clear to the most discerning... America's **GOLDEN AGE** was over.

By 2008, banking was teetering on the brink of disaster with the fall of several large banks and financial entities. Housing markets plummeted, leaving multitudes in foreclosure. Wall Street crashed ruining the retirement plans of multitudes of senior Americans.

By **2010**, hundreds of thousands of workers – including Mexicans, Brazilians, and Thais – were drawing their paychecks from Beijing. Even the Americans and Canadians had gotten roped in. Many of them working for giant Chinese corporations they hadn't even heard of when the 21<sup>st</sup> Century first began.

Meanwhile, back in China, God's great pawn to shake the nations, the good times were just getting started...

## China's "American Dream"

The Chinese middle class – all 300 million of them – was living the good life. Luxury cars and larger houses... cities full of steel and glass skyscrapers... subdivisions of new homes filling up faster than they could be built... modern, even posh, shopping centers bathed in the glow of neon. It looked just like historians used to call the building of the "American Dream."

Christian believer, this is no fantasy. It is a prophetic look at the future.

If China gets what it wants... seduced by God's plan to bring them into his hooks, much as He did ancient Egypt, allowing this scenario to be played out... a divine "battle plan" for things to work for this period in China's favor... it WILL win the economic war...

America, as a nation, WILL go broke... and millions of U.S. investors, especially the young professionals and retired citizens, who invested in Wall Street, who counted on the U.S. system of economic security, will lose billions of dollars... not in 45 years from now... not even in 10 years... but beginning here and now. Many within the American Christian community will live in denial until it is too late. Surely God would not allow the Christians in the United States to go through such perilous events.

In 2004, God moved upon Dr. Oral Roberts with a prophetic vision. He faithfully shared an impending judgment which, he declared, was eminent. But the Church in the United States walked in a unique pride, a belief that the United States was in some way God's "chosen" nation, unaware that the only real chosen nation until it is taken out of the earth is the great body of Christ, no matter which Gentile nation they chose as their homeland. Some will view this occurrence in its most negative light. It will seem shocking to most Christian believers that **this could prove positive** for a plan of God to bring the vast wealth of all nations into the hands of His people. Believe me, it is already happening... well under way... and only those who have their source in God, in the Word of God, will prosper from this scenario.

## A New Saying In China!

The party bosses in Beijing have a new saying that would make Chairman Mao turn over in his grave. If you were living in China, if you were being educated and oriented to the new Chinese culture, you would be aware of this new saying. It is "*Getting rich is glorious.*" Recently, I read of this in the *U.S.A. Today*. As I did so, something stirred in my heart that took me to an extended place of prayer. Immediately the prophetic assignment in me came to attention. After several days of prayer and research, I know that it is directly related to the *prosperity phenomenon* coming to the body of Christ.

There is no stopping what is being planned by the world economic/social/financial powers. China, now in step with the international banking community, will stop at nothing to make this happen. They are in God's hand for a purpose, and for a period of time, everything they do will seem to prosper. China is the United

States' 3<sup>rd</sup> largest creditor, owning \$7.3 trillion dollars in U.S. assets, \$120 billion – in U.S. Treasury bonds alone – with the 2<sup>nd</sup> largest creditor being Japan holding \$141 billion in U.S. Treasury bonds. Just those two alone make up for more than half of foreign-owned U.S. government debt.

Either country could tell the United States to take a flying leap in a lake... and there is nothing we could do, because if either decided to dump those huge holdings of U.S. debt, the U.S. economy would be done for. God's wisdom warned, Pro 22:7 MSG *"The poor are always ruled over by the rich, so don't borrow and put yourself under their power."*

There is no way to know how much personal stock or corporate bonds they hold, but experts estimate that it is a considerable, possibly huge amount. And they could dump that at any time too.

The moment the "Sell" signal comes, a bond market collapse... rising interest rates... even more dollar devastation... and a spiraling descent of the stock market... are all guaranteed.

As you will see, China has planned the total destruction of America's worldwide financial advantage.

Americans feel "house rich." Many have fat stock portfolios stuffed with the biggest and most popular company names in America. Because the U.S. is already more vulnerable to this attack than almost any of its citizens understand, the Chinese are able to pull it off. There are none so blind as the politicians. Most are so swallowed up in their personal home agendas that they won't even look at anything outside of their own domain. Our nation has been locked in to a focus on international terrorism, looking for bombs and chemical terrorists, meanwhile we are under the most severe attack, capable of totally destroying the way of life which we know as the great American society. This attack is not taking place in our airports or on the killing fields in Iraq... but in our bank accounts! Think about it. Already, here in 2005, we've got...

- A \$600 billion trade deficit

- A steady loss of high-wage manufacturing jobs to China and Mexico
- A near zero personal savings rate, high credit card debt, and an epic housing bubble.
- A secret government deficit of some \$44 trillion dollars
- A series of foreign wars, designed to deplete the U.S. Treasury, sending the printing presses of our fiat currency into an unimaginable production cycle, polarizing the population, and alienating the world.

## The Chinese Know This

They have a secret plan to take advantage of it.

Believe me, it's important for you spiritually and financially to know what they intend to do. It is important for us to know how to protect ourselves, and how to flow with God's great wealth inversion, prosperity phenomenon plan.

Here is a quick preview of what the experts say Beijing is already doing – right now – to lay an economic minefield in the American economy.

**First, the Chinese accumulated over \$2.2 trillion in U.S. dollars.** Cashing in U.S. Treasuries gave China plenty of money to sock away huge piles of raw materials and resources, all needed for the immediate future.

**Then China slowly replaced the United States as the No 1 destination for foreign direct investment.** China didn't need its own investment capital. It got plenty from the United States, which built thousands of factories to take advantage of China's humongous and super-cheap labor force.

**And finally, China played a dangerous strategic game to corner most of the world's oil.** Without realizing it, the United States played exactly into China's hand... alienating the Saudis... who found themselves a new superpower protector in Beijing. And a new customer for the world's most precious – and essential – commodity.

It won't take much to unleash this financial firestorm. All China has to do is start dumping U.S. Treasury notes. In a flash, suddenly interest rates soar. So do mortgage rates. And it's like a **Bomb** hitting the U.S. housing market...

Home prices plummet. So do stocks. Retirement savings vaporize. Companies fire their U.S. workers and close their doors in mass. Or they pack up and move to China. Quoting the U.S. News and World Report, *"Overnight, millions of Americans are poorer than they ever imagined they could be.*

But not everybody will be destroyed by this great world-wide economic siege.

Dan 12:1-10 MSG *"That's when Michael, the great angel-prince, champion of your people, will step in. It will be a time of trouble, the worst trouble the world has ever seen. But **your people** will be saved from the trouble, **every last one found written in the Book** (3) 'Men and women who have wisdom and understanding will shine brilliantly, like the cloudless, star-strewn night skies. And those who put others on the right path to life will be as the stars in the heavens. (5) As I, Daniel, took all this in, two figures appeared, one standing on this bank of the river and one on the other bank. (6) One of them asked a third man who was dressed in linen and who straddled the river, 'How long is this astonishing story to go on?' (7) 'The one dressed in linen, who straddled the river, **raised both hands to the skies. I heard him solemnly swear by the Eternal One that it would be a time, two times, and half a time,** that when the oppressor of the holy people was brought down the story would be complete. (9) 'Go on about your business, Daniel,' he said. 'The message is confidential and under lock and key until the end, **until things are about to be wrapped up.** (10) The populace will be washed clean and made new. **But the wicked will just keep on being wicked, without a clue about what is happening. Those who live wisely and well will understand what's going on.**"*

China, now in 2005, is already becoming the economic center of the universe. A lot faster than you realize. Credible evidence shows

that not only is China still growing at a blistering pace... but that it's growing **deliberately at the EXPENSE of the American economy!**

You must get this. The Chinese government has devised a specific three-pronged strategy to suck the fire out of the American economic machine... to use that wealth to line their pockets... and to lay the foundation for China's own bright future.

Now here is what America is up against... how the experts say we got into this situation.

A headline found in *The Vancouver Sun* calls it "The Big Sword Overhanging The U.S. Economy.

*The New York Times* says "This savage attack from the Far East threatens the very stability of both the U.S. and global economy."

Finally, the *Irish Independent*, considered to be one of the most accurate reporting agencies in the world says, "This could rip the heart out of manufacturing growth in America and all of Europe."

It's happening now, not in 2015, but right now. If you are discerning at all, you will know that the Chinese are already hoarding raw resources. They're already stealing natural gas from Japan's exclusive economic zone in the East China sea. They're already flexing their "nuclear muscles" against neighbors like Taiwan. And they've already met with Vladimir Putin as well as the Saudi princes to make secret deals for future petroleum reserves...

It's all bad news for the rest of the Gentile world.

**But none of it compares to the \$2.2 trillion TRAP China has set for America.**

This is the key to China's plan... a deliberate, methodical assault on the United States... designed to bring our way of life and our dominance in the world to a screeching end.

There is no time for apologies. And no time to drum up excuses. Very soon China will finally decide to pull the plug and bring the American economic miracle to a halt.

Make no mistake. The “combatants” in this war may not carry guns or ride in tanks. They will arrive in limousines and wear business suits. They’re out in this war to win.

No wonder God has spoken to us that our angels will arrive, not in chariots this time, but in business suits with financial and tech savvy directly from the throne of God.

Now having looked at these facts in light of scriptural prophetic insight, let’s step back for a moment and remind ourselves...

When we talk about modern China, we’re not talking about a democracy of economics. We are talking about **a military dictatorship**. This is the way they currently are conducting business.

Experts are calling it “**Guerilla Economics.**”

The goal is to destroy its competition. And at the same time... *create a guaranteed money-making environment for China’s own entrepreneurs.* Here is some proof.

Ding Lei is 32 years old. He’s also the richest man in China. His **NetEase.com** company didn’t crank out a dime of profit until 2003. But his stock is up 50-fold thanks to ecstatic American investors backing him – Ding is now *personally* worth \$900 million in only two years.

Chen Tianqiao is just 30 years of age. In 1999, he ran a cartoon Web site. Now he runs **Shanda Networking**, an online business out of Shanghai. New York venture capitalists helped him do it. Now he’s *personally* worth \$480 million.

Larry Rong’s dad is Rong Yiren, founder of CITIC, the biggest company in China and a magnet for U.S. Investment dollars. Larry is

*personally* worth \$850 million. His family net worth is set at \$2 billion.

The military government in China has its hands directly deep in the pie too. For example, China's biggest TV and Cell phone maker, **TLC Corp.** It is state owned. ***Last year, it exported 3.83 million TVs. It expects to ship 5 million more this year!***

The top 100 richest people in China now have an *average* wealth of \$230 million. Another 10,000 more Chinese are worth at least \$10 million so far. And that is up from **zero millionaires** as recently as 1985.

Then there are the corporations listed on the Shanghai exchange. They are almost all state owned. The top 14 Chinese car manufacturers are state owned – with bloated bureaucratic budgets. But that doesn't matter – in 2004, U.S. investors poured millions and millions of dollars into China Brilliance Automotive shares – *and its stock shot up 250%*.

China has definitely cracked the code of Western capitalism.

Three years ago, for instance, China didn't manufacture a *single* laptop. *NOW* they make 40% of all laptops sold worldwide! The are also ranked as the world's biggest maker of computer hardware... consumer electronics... even steel (remember when that used to be Pittsburgh?)

38% of the world's cell phones are made by China. And half of all the shoes in the world are currently being produced by them. Plus most of the furniture, video games, and televisions of U.S. companies are made for them by the Chinese.

## **The China Boom At Here At Home**

Here in the United States, **American Metal Ware** had made nearly 2.5 million pots in their Wisconsin factory... before they had to

shut it down. Chinese manufacturers stole their designs and cranked out copies at half the price. To compete, Metal Ware had to move all of their operations to China.

**Levi's** were the all-American brand. They once had 63 plants in the U.S. They just closed the last two and fired all the remaining employees. Levi's will be made exclusively in China now.

Walt Disney was an all-American success story. But **Disney's** millions of dolls are no longer made here, but in the same place as **100% of all of Dr. Scholl's sandals and Foster Grand Sunglasses** – China.

Then there is **Wilson** sporting goods, so synonymous with all-American sports, or **Black & Decker** drills and other tools... silk flowers, sneakers, wood furniture, hand-held **GameBoy** video games...all sold here, but all manufactured in – China.

A mind blowing **80%** of all the toys, bikes, and Christmas tree ornaments sold in the United States come from China – **90%** of all sporting goods of any kind and **95%** of all shoes sold in the U.S.

**Motorola** spent over \$1 billion moving operations from the United States to China. Thousand have lost their jobs – replaced by 10,000 Chinese *slave workers* in six new plants on the coast of the Yellow Sea.

I recently heard that a radio show host made a public dare:

*“Take \$400 and an hour in Wal-Mart. Buy as many ‘Made in America’ goods as you can.”*

Two listeners took the challenge.

An hour later, they hit the checkout line with 40 items. Guess how many actually *were* made in America? It turned out only 10.

*Wal-Mart* trucks used to speed down the highways of America proudly bearing the slogan, *“Wal-Mart – Made In America!”*

Sam Walton, Wal-Mart's founder, wrote an autobiography. He titled his book, *Made In America*. But today, *Wal-Mart alone* imports a mind-blowing \$12 billion of goods from China annually... and that figure is expected to drastically increase this year.

*Wal-Mart's business alone was more than China's trade with either Russia or the entire United Kingdom!*

## Beijing's Ugly Secret #1 "Crush the Competition With Slave Labor!"

Chinese workers average 61 Cents an hour. U.S. factory workers average \$16 Dollars an hour. In other words, U.S. workers make more in *two weeks* than most Chinese laborers make in a *whole year!*

Nobody outside of China, anywhere in the world, can compete with that.

China gets an endless supply of labor for just pennies. And there is a waiting list nearly 200 million people long to take over those jobs when the current workers drop from exhaustion (they work 12 hour days, seven days a week).

Moral or not, Beijing's *slave –labor* strategy does exactly what they hoped it would...

*It's sucked the life out of America's more costly industrial complex!*

Take time to check out for yourself the numbers: *Over 450 U.S. companies* are based in China. That is more than *10 times the number of U.S. companies there in 1990*. They've got combined annual sales of *\$23 billion*. And more than *250,000 employees*. In fact, U.S. investment in China is now a record *\$33 billion a year!*

Meanwhile...

Nearly *2,250 American manufacturing jobs* here in the United States disappear each and every single day! That is not something

brand new... *it's been the trend day in and day out, over and over again... for 40 months straight!*

According to the Senior Editor of *Strategic Investment* magazine, *"They have studied and learned the lessons of the Rothschild dynasty, J.P. Morgan, John D. Rockefeller, and international banking houses...It's the genius of any ruthless monopoly maker: first, move in and CRUSH the competition with cutthroat techniques. Then... take away his business and leave him high and dry!"*

Thanks to slave labor, Chinese companies can now crush U.S. competition with lots of cheaply produced goods that *formerly* were made right here in America. In exchange, they not only get our purchases... they get our *companies* when they are forced to pack up and move over to China so they can take advantage of the same cheap labor strategy.

*China is like a great magnet, when they are ready to fully turn it on, poised to offer U.S. companies an unbelievable bargain to gain access to the global world... just send your jobs here...and you will be able to compete in any nation in the global marketplace... leaving the U.S. with no jobs for its employees.*

What is more, China also gets to send a whole *new* kind of export to America... Chinese STOCKS AND BONDS! And in return for that, they get *billions* more in investment capital. Straight from the trading accounts of private U.S. investors. Imagine.

*We are literally paying Beijing to "rip the heart" out of the U.S. heartland!*

But it gets worse for the industrialized nations of the world. Because that's only the *first dirty strategy* being engineered and overseen by Beijing. *Here is the second...*

**Beijing's Dirty Secret #2**  
***"Bait the Trap With Treasury Notes!"***

Another fallout from Beijing's super cheap labor strategy is America's massive trade deficit with China. *It literally keeps EXPLODING!*

It has already passed a gap of over \$120 billion. That means we actually BUY \$120 billion more in goods *from* China than we manage to sell. A household can't get rich... or stay rich... if it spends more than it takes in. Neither can a nation.

Yet no matter what we try to do to stop the gap from growing... weaken our dollars, create trade tariffs, perfect production and slash costs... America just can't keep up.

The trade deficit is now exploding *\$1.5 billion per day*. Putting that in perspective... **that means we spend an additional \$1 million on Chinese products... every single passing minute!**

But that is still not the worst part. *Guess what China is doing with all that money?*

- First, the money we send China gets reinvested in the PLA, China's massive military. *(The U.S. Defense Department reports that China has just built low-profile military bases on several disputed reefs in the Philippines!)*
- Second, it goes back into funding more *huge* Chinese factories. With 200 million Chinese wanting to break into the new Chinese capitalistic work force, *China need to build places for them to work! It also need to by HUGE stockpiles of raw resources to keep the factories running.*
- Third, and most dangerous of all, the Chinese government uses a lot of its extra exporting income... *to pile up an absolutely incredible number of U.S. Treasury bonds!*

Get this. China spends nearly *\$7.8 million an hour... or \$187 million a day...* snapping up U.S. Treasuries and dollars. ***The movers and shakers in China now hold the U.S. hostage to over \$120 billion in Treasury certificates!***

Now ask yourself:

If its obvious that U.S. interest rates have nowhere to go but up... if its obvious the U.S. dollar has no where to go but down... and if its obvious that our Federal Government right now is literally *spending America into oblivion...*

***Why would the Chinese government have so much faith in our U.S. Treasury certificates?***

The answer: It's not a vote in America's future at all. Instead, it is Beijing's way of *backing America into a corner!* Think about it! If I, as a financial "laymen" can see this, what about Beijing's professional economists and the international financial banking experts?

On February 5, 2004, an article in ***The Wall Street Journal*** reported that other Asian countries – who altogether with China and Japan included hold an eye-popping ***\$1.9 Trillion*** in U.S. foreign reserves – are starting to dump U.S. debt.

Korea and Thailand dumping is one thing. But when a massive holder like China stops buying U.S. debt and starts dumping, it's a much, MUCH bigger deal. If you don't believe it, ask any financial planning professional. Pressure on U.S. bond yields will skyrocket. Other foreign investors will run from the dollar priced securities in a panic. Long-term interest-rates will jump. **And U.S. consumers, businesses, and investors will be crushed in the jaws of a very powerful "Treasury Trap"!**

It won't take more than a whisper (as a recent fluke revealed when a Chinese Ambassador talked out of turn) – "Sell!" And every prediction mentioned thus far will occur – and economic disaster will be the result.

*But there is still a third part to the strategy...*

**Beijing's Dangerous Strategy #3**  
***"Lock the U.S. Dollar In a Death Struggle***

To finance all its foreign debt, the United States has to spend a breathtaking *\$55 million per hour... or \$1.3 billion per day...* just to keep enough new *fiat* currency flowing into the system to cover overseas interest-payment obligations.

The Federal Government treats the Federal Reserve Bank *like a money machine.*

I recently distributed a paper featuring excerpts of Georgetown University Professor, Carol Quigley's book, *Tragedy and Hope*. He related an item from the First Continental Congress' debate concerning our currency system, and whether or not to allow in the U.S. Constitution a debt based currency such as we now have. He quoted a Massachusetts delegate as saying, *"Do you think gentlemen, that I will consent to load my constituents with taxes, when we can send to our printer and get a wagonload of money, one request of which will pay for the whole."*

More recently, one congressman stated, *"Walk up, punch the buttons on the printing press, and out comes the cash!"*

Why? Because the more dollars there are, the less they're worth. And the less they're worth, the easier it is to cover those interest obligations without wincing.

The trouble is, no government – not even one as great as America's – can keep up with that kind of program. Especially when you're overextended on your own personal spending budget by nearly *half a trillion* dollars!

So just holding U.S. Treasury, Beijing already has us trapped.

This is not news to me. But only recently have I realized that they haven't stopped there.

China has *also* hoarded piles and piles of ever cheaper U.S. dollars. They've now got more than *\$310 billion in U.S. dollar reserves!* Again, you have to ask:

If U.S. dollars are backed by an overextended Federal Government... and if other major governments worldwide are already talking about switching reserves to gold and euros... and if America's money isn't worth the paper it is printed on...

**Why would China want to keep so much of its newfound wealth in the U.S. dollar, a currency that's already down more than 50% since October 2000?**

Again, its simple to those who have understanding.

Since 1995, the Chinese currency – the yuan – has been pegged to the dollar at the weak exchange rate of 8.28 to the dollar. No matter how low the dollar goes, the yuan goes with it.

So no matter how low the dollar goes... *it's virtually impossible to close any currency-related trading gap we've got with China!* It's like seeing how long two enemies can hold their breath underwater.

Whoever can withstand having a dirt-cheap currency the longest wins. But so far, judging just by the trade deficit, it looks like China is winning big time. And the United States is running out of options.

Remember the yuan strategy is... if the dollar rises, the yuan rises in lock step. If the dollar drops, so does the yuan. China's trading advantage never disappears... but we risk popping our own real estate bubble, slashing trade with Europe, and knocking the legs out from under our stocks and bonds.

Meanwhile, China still holds *\$310 billion* in dollar reserves... that it can trade for euros or gold at any time... and use it to throw the dollar into a final death spiral.

When Beijing starts dumping, what follows could be worse than anything this generation has ever experienced including the Great Depression.

Now here is where, in the natural it could get really scary... but remember... we are the body of Christ... we are on the winning side and will be taken care of by God's great prosperity phenomenon in the same fashion as Israel was delivered out of Egyptian bondage.

## Chinese Military Reports *"America Is the Enemy"*

If you still think I'm just gathering speculative articles to enhance my prophetic files... that this couldn't possibly be planned on purpose by the international powers that be... maybe you haven't yet heard about a hugely popular book that's still making the rounds... first in Beijing... and currently at the White House, the Pentagon, and CIA headquarters.

The book is called *Unrestricted Warfare*. It is written by *Colonels Qiao Liang* and *Wang Xiangsui*, two very high-ranking officials in the People's Liberation Army of China (PLA).

In their book they say, *"America will be China's most likely enemy for at least the next two decades, if not for the whole 21<sup>st</sup> Century."* *"The battle,"* they say, *"will be fought in every arena...everywhere."*

Several specifics mentioned in the book are, *"drug smuggling... attack on America's computer networks... media manipulation... intellectual privacy... exploiting loopholes in international law... and one of the most powerful weapons of all, attacking America's financial base."*

Here is another direct quote from Page 51 of the book:

*"Financial war is a form of nonmilitary warfare which is just as terribly destructive as a bloody war, but in which no blood is actually shed... When people revise the history books..."*

*the section on financial warfare will command the reader's utmost attention."*

The book also recommends Chinese companies infiltrate the U.S. Stock Market.

Imagine if the U.S. Government started building companies just to drain income from the Dow and NASDAQ investors' pockets. Imagine the U.S. Army taking over Motorola or QUALCOMM so that they could suck technology secrets out of other nations. Maybe it couldn't happen here.

But that is business as usual in Beijing. With companies like PetroChina, the huge state-owned Chinese oil company. Or Hutchinson-Whampoa, the state-owned Chinese construction conglomerate. Or COSCO, China's state-owned shipping giant, larger than any other in the world.

The list goes on. Recently, the U.S. Congress named over 3,000 front companies for the Chinese army operating inside the United States. This is no fairy-tale scenario.

Washington has no grip on this at all. They are out looking for bombs and chemicals. Neither does Wall Street. Why do they refuse to see it? Because it would have such a devastating effect on the markets. The movers and shakers are trying to get at least one more big deal under their belts. One more million dollars in their accounts before it all goes bust.

It's like it was on the Titanic just before it sank... *"keep the musicians playing the violins... we don't want the people to panic!"* You can ignore reality only so long, with or without panic, there will come a time that it will be brought face to face with reality.

Here is what is in the mix right now. A recent run-up of gold prices... Greenspan's interest-rate games... Bush's war in Iraq... and the flood of profits mounting in defense stocks... all of these working together to keep thing going a little longer before coming face to face with the consequences.

Here are some recent famous quotes:

*“The bond and securities markets are the mother lode of American finance capital. If Beijing taps that, there will be no end to the funds she can raise and almost no control over how they might be used.”* – **Pat Buchanan, Former White House Advisor**

*“America’s growing reliance on high quality, low price Chinese imports eventually could undermine the U.S. defense industrial base.”* – **U.S.-China Economic and Security Review Commission Report**

*“The United States finds itself in the same shoes as Great Britain toward the end of the 19<sup>th</sup> Century.”* – **Kenneth Courtis, Senior Vice Chairman, Goldman Sachs**

*“China most surely has the capacity, the willpower, the structure, and the command economy to rip the heart out of Europe and America over the next two decades.”* – **Irish Independent, September 26, 2004**

*“The labor-oriented Economic Policy Institute in Washington, DC estimates that Americans lost 344,000 jobs last year because of Chinese imports. And institute economist Robert Scott calls it ‘the tip of the iceberg’.”* – **Milwaukee Journal Sentinel, June 6, 2004**

*“China, in violation of both its IMF and WTO obligations, is in fact manipulating its currency for trade sabotage against the United States.”* – **Roger W. Robinson, Jr., Chairman, U.S.-China Economic and Security Review Commission Report**

*“We cannot assume our enemies will abide by our own moral business codes. In fact, we very much should assume the contrary with regards to China.”* – **“Confrontation and Combat in the Information Age” – U.S. Department of Defense, March 2004**

*“Many economists believe that the Chinese currency is purposefully being undervalued by as much as 40%, giving the country an unfair advantage in being able to under price competitors in every international market.”* – **The Washington Times, December 10, 2004**

*“As for the United States, for a relatively long time, it will be absolutely necessary that we quietly nurse our sense of vengeance. We must conceal our abilities and, bide our time...”* – **General Mi Shenyu, Vice Commandant, Beijing Academy of Military Sciences**

*“Wal-Mart, the U.S. retailer, now has more than 300 permanent buyers in China, and last year imported \$12 billion of Chinese goods... if Wal-Mart were a country, it would rank ahead of Great Britain and Russia in total imports.”* – **Irish Independent, September 26, 2004**

*“The first rule of unrestricted economic warfare is that there are no rules, with nothing forbidden, except getting caught.”* – **Col. Qiao Liang and Col. Wang Xiangsui, China’s People’s Liberation Army, co-authors of Unrestricted Warfare**

## How China Expects to Win

Has there ever been a rising power, in the pages of history, that has picked up economic momentum... packed on military might... and then decided *not* to flex its muscles?

The answer, as you well know, is that there hasn’t. Power is deliberately acquired for one purpose... to rule! The nations that have it chomp at the bit to use it. Which is exactly what China is doing *now*.

I found this as I investigated information being provided by the **U.S.-China Economic and Security Review commission. Roger W. Robinson, Jr**, head of the organization, gave this testimony to the U.S. House of

Representatives back in October. He laid out the Chinese blueprint for undermining the U.S. economy:

- First, they devalue their currency by as much as 40%
- Then they issue tariffs on foreign goods
- They cut foreign firms off from local marketing channels
- They chaperone and handpick partners for international joint ventures
- They give preferential loans to their own factories from state owned banks
- Chinese companies get privileged listing on the Chinese stock market
- Chinese companies get special tax breaks not available to foreigners

As you can see, while the United States wasn't looking, someone bought America... *right out from under us!*

Where exactly does China fit in our great *prosperity phenomenon?*

Just last week, as God began to speak prophetically into my spirit concerning this matter, I found this very current article. It bears the need for very close examination.

## **Arms sales to China rattle US**

*EU plans to sell weapons to Beijing have brought American fears to the surface, writes Washington correspondent Roy Eccleston February 26, 2005*

GEORGE W. Bush's European trip may have improved the tone of trans-Atlantic relations on the thorny issues of Iraq and Iran, but it has also revealed the depths of US concern about the rapid emergence of China's military power. The new source of tension is Europe's plan to lift its arms embargo on China, introduced after the 1989 Tiananmen Square crackdown.

The US President, reflecting deep congressional anger, opposes the move because the US believes it will allow China to buy

technologies that will better equip it to strike Taiwan and US forces in the region.

"There is deep concern in our country that a transfer of weapons would be a transfer of technology to China, which would change the balance of relations between China and Taiwan," he said after meetings with European leaders.

Mr Bush was skeptical of European Union assurances that tough new controls on exports would prevent China's military gaining an advantage.

Members of Congress and conservative analysts in Washington are already pushing for retaliation against any European firms that sell military wares to China, which the White House sees as a **"strategic competitor"**, not the **strategic "partner" of Bill Clinton's time**.

"They know the Congress's concern," Mr Bush told reporters after his meetings with the Europeans. *"So they will try to develop a plan that will ease concerns. Now, whether they can or not, we'll see."*

But the emergence of the issue underscores not just continuing disagreements in the Western alliance, but **deeper US uncertainty about the massive growth in China's military and economic power**.

It has the potential to sour relations between the US and China at a time when Mr Bush needs its backing in negotiations with North Korea and possible UN Security Council sanctions on Iran. And it has focused attention on growing tensions between China and a newly assertive and internationally active Japan.

With an annual defense budget of about \$US500billion (\$635billion), the US dwarfs the estimated \$US50-70billion-plus China is spending. But ***China now has the world's second-biggest arms budget and it has been rising by 10per cent a year***, according to Japanese assessments.

"China can't match the US and that's not their strategy," says Carl Conetta, a China military specialist at the Commonwealth Institute in Massachusetts.

"What they want to do is control all of the major Asian states of concern to them. ***Their strategy is economic warfare not military action. But military strength fits into the equation of their ongoing quest for global dominance world trade.***"

"The long-term story here, if you believe a lot of the neo-conservative thinkers in the US, is that looking forward 20 or 30 years, there's two struggles the US has to face," Mr Conetta says.

The first is the battle with Islamic terrorists, ensuring they cannot strike with weapons of mass destruction, or control oil supplies. "The next phase is China."

With the election of President Donald Trump, the United States has experienced a "shaking" within its own government, justice system, culture, media, and educational system, all purposed to bring an end to his presidency.

The trade war with China is currently in progress, and China has yet to determine how it will respond.

The Day of Jehovah Tsaba (the Lord of hosts), clearly is about the "rich sea trade and the wealth of nations." (Isaiah 60:5-6.

Between now and 2025, much will occur with regards to China. Eventually, God (as Jehovah Tsaba) will, with his hooks in China, take in hand the task of the great Prosperity Phenomenon – The Day of Jehovah Tsaba.
